

Prof. Tonglei Li,  
Department of Industrial and Physical Pharmacy,  
Purdue University

**Subject:** Application for the Graduate Assistant Web Developer Position

Dear Prof Li,

I am writing to apply for the position of Graduate Assistant listed on the ECN department website. Coming from a Computer Engineering background from my undergrad and now currently pursuing my Master's Degree at Purdue, I have been able to learn various programming languages and develop my analytical skills.

As an intern at Clover Infotech Pvt Ltd, I was able to develop and maintain a fully functional news repository website which used MySQL databases. I have also founded a startup that develops websites for different educational institutes. Along with this, I have enrolled for various courses related to data management such as Database Systems, Machine Learning and Data Mining. My undergraduate and graduate courses involved intensive programming in Python and Java. I am currently developing a website for the AAE Dept and Purdue University and will be completing my assigned project by the second week of November. As a result of these experiences, I am comfortable supporting and executing a range of projects and programs in Python, C, MySQL, Java, CSS and HTML. I possess the comprehensive skill set and understanding necessary to affect positive, overreaching outcomes in this role.

I look forward the opportunity learn more about this opportunity and to discuss how I can contribute my strengths at Purdue University. I appreciate your taking the time to review my credentials and experience.

Have a great day!

Sincerely,

Alex Anto Chirayath
